

May 6th, 2024

To Our Valued Customers:

The Nucor Sheet Group is committed to providing real-time, relevant, and transparent hot rolled spot pricing, through our CSP.

Recently, spot order activity has been limited and not reflective of underlying demand due to a variety of competitive factors, including what appear to be increasing volumes of speculative purchases of additional tons through contract mechanisms at discounted prices. Our CSP aims to provide our customers an accurate price that takes into account these and other relevant market factors, while also offering our customers superior lead times.

As a result of the above, effective immediately, the CSP HRC base price for the week of May 6th will be \$760/ton for all producing mills, except CSI, where our CSP HRC base price will be \$840/ton.

Thank you for the opportunity to earn your business.

Sincerely,

Aaron Barnett
