# HOT-ROLLED BANDS

Steel Dynamics base hot-rolled steel sheet is an unprocessed band directly off the hot-strip mill and has not been side-trimmed or cropped back to gauge. As rolled, hot bands may be susceptible to coil breaks. Additional processing such as temper passing, pickling, edge trimming and tension leveling are available on site or via a qualified external processor. SDI hot-rolled bands are produced on a 30" ID. All processed hot-rolled steel sheet will be provided on a 24" ID. Our products are produced to a specified minimum or nominal thickness and are sold on an actual scale-weight basis.

## STANDARD THICKNESS AND WIDTH EXTRAS

Please note that certain grade, thickness, and width combinations may not be available. Please refer to our product capabilities for more information.

Additional sizes may be available on an inquiry-by-inquiry basis.

Nominal Thickness		Minimum Thickness		Width		
Under	Thru	Under	Thru	36"– <42"	42"– <48"	48"– 62"
0.388	0.084	0.375	0.081	\$4.00	\$2.00	Base
0.084	0.069	0.081	0.066	\$4.50	\$2.50	\$0.50

HSLAS Grade 65	\$4.75	\$4.25
HSLAS Grade 70	\$5.50	\$5.00

#### High-Strength Low-Alloy Steels with Improved Formability

HSLAS-F Grade 50	\$2.50
HSLAS-F Grade 60	\$4.00
HSLAS-F Grade 70	\$5.25
HSLAS-F Grade 80	\$6.50

#### Ultra-High-Strength Steels

UHSS Grade 90 Type 1	\$8.00
UHSS Grade 100 Type 1	Inquire

### ASTM A36

Hot-rolled carbon steel sheet used for general structural purposes. Coils are excluded from qualification to ASTM A36 until they are cut-to-length and processed into a finished structural product.

For Conversion to ASTM A36	\$0.50
----------------------------	--------

### ASTM A414

Hot-rolled high-strength, low-alloy carbon steel sheet for pressure vessels. Coils are excluded from qualification to ASTM A414 until they are cut-to-length. Processor is responsible for testing and certifying tensile from center of coil.

For Conversion to ASTM A414 Grade C	\$1.50
For Conversion to ASTM A414 Grade G	\$1.50

### ASTM A572

Hot-rolled high-strength, low-alloy columbium-vanadium carbon steel intended for riveted, bolted, or welded structures. Coils are excluded from qualification to ASTM A572 until they are cut-to-length and processed into a finished structural product.

For Conversion to ASTM A572 Grade 50 Type 1	Inquire
---	---------

### ASTM A606

Hot-rolled, high-strength, low-alloy carbon steel sheet with improved atmospheric corrosion resistance.

Type 4	\$10.50
--------	---------

Widths other than 48", 60" may be subject to accumulation.

### ASTM A786

Hot-rolled carbon steel floor plate, Pattern No. 4.

ASTM A1011/A1018 Commercial Steel Type B	\$3.00
For Conversion to ASTM A36	\$3.50

Widths other than 48", 60" may be subject to accumulation.

**ADDITIONAL MATERIAL SPECIFICATIONS SUITABLE FOR CONVERSION TO CERTAIN ASTM PLATE SPECIFICATIONS AND CERTAIN ASTM AND PIPE AND TUBE SPECIFICATIONS MAY BE AVAILABLE ON AN INQUIRY-BY-INQUIRY BASIS.**

All offers expire after 24 hours, unless otherwise noted, and are subject to availability. All material is expected to ship within five business days from notification of availability. All truck pre-paid shipments will be invoiced at 40,000-pound minimum quantities. All prices are per hundred-weight and are based on actual scale-weight billing. Our products are sold FOB seller's place of business, or a seller-designated storage or outside processing facility.

### MINIMUM LINE ITEM QUANTITY

40 tons or more	Base
Less than 40 tons	\$1.00

Line item is defined as same grade, thickness, and width, with one delivery date for the entire line item. Please note that certain grade, thickness, and width combinations may require a minimum order quantity of up to 450 tons to avoid accumulation.

All offers expire after 24 hours, unless otherwise noted, and are subject to availability. All material is expected to ship within five business days from notification of availability. All truck pre-paid shipments will be invoiced at 40,000-pound minimum quantities. All prices are per hundred-weight and are based on actual scale-weight billing. Our products are sold FOB seller's place of business, or a seller-designated storage or outside processing facility.

# COLD-ROLLED SHEET

Steel Dynamics base cold-rolled steel sheet has been cold-reduced to the specified thickness and subsequently annealed and temper-rolled to achieve the specified characteristics. Alternately, customers may specify a full-hard cold-rolled sheet with off-gauge heads and tails cropped at the temper mill. SDI cold-rolled sheet is produced on a 24" ID. Our products are produced to a specified minimum or nominal thickness and are sold on an actual scale-weight basis.

## STANDARD THICKNESS AND WIDTH EXTRAS

# GALVANIZED HOT-ROLLED SHEET

Steel Dynamics base hot-rolled, hot-dipped galvanized or galvanized product is a cost-effective solution for heavy-gauge, unexposed applications where mild surface defects such as coil breaks are not objectionable. Temper rolling may be specified to minimize the presence of cosmetic defects. A variety of surface treatments is available to further inhibit oxidation or to improve formability. SDI galvanized and galvanized steel sheet is spangle-free and is provided on a 24" ID. Our products are produced to a specified minimum or nominal thickness and are sold on an actual scale-weight basis.

## STANDARD THICKNESS AND WIDTH EXTRAS

Our products are sold FOB seller's place of business, or a seller-designated storage or outside processing facility.

# GALVANIZED COLD-ROLLED SHEET

Steel Dynamics base cold-rolled, hot-dipped galvanized or galvanized product is suitable for a broad range of applications. While generally well-suited to surface-critical applications, this product may be specified as extra smooth in order to minimize the presence of cosmetic defects. A variety of surface treatments is available to further inhibit oxidation or to improve formability. SDI galvanized and galvanized steel sheet is spangle-free and is provided on a 24" ID. Our products are produced to a specified minimum or nominal thickness and are sold on an actual scale-weight basis.

All offers expire after 24 hours, unless otherwise noted, and are subject to availability. All material is expected to ship within five business days from notification of availability. All truck pre-paid shipments will be invoiced at 40,000-pound minimum quantities. All prices are per hundred-weight and are based on actual scale-weight billing. Our products are sold FOB seller's place of business, or a seller-designated storage or outside processing facility.

# GALVANIZED COLD-ROLLED SHEET

Steel Dynamics base cold-rolled, hot-dipped galvanized product is suitable for a broad range of applications. While generally well-suited to surface-critical applications, this product may be specified as extra smooth in order to minimize the presence of cosmetic defects. A variety of surface treatments is available to further inhibit oxidation or to improve formability. SDI galvanized steel sheet is spangle-free and is provided on a 20" or 24" ID. Our products are produced to a specified minimum or nominal thickness and are sold on an actual scale-weight basis.

## STANDARD THICKNESS AND WIDTH EXTRAS

*Please note that certain grade, thickness, and width combinations may not be available. Please refer to our product capabilities for more information.*

*Additional sizes may be available on an inquiry-by-inquiry basis.*

# GALVALUME® SHEET

Steel Dynamics GALVALUME® product offers excellent corrosion protection in many applications through the combination of the sacrificial protection of conventional zinc coatings with the excellent barrier protection of aluminum. This product may be specified as extra smooth in order to minimize the presence of cosmetic defects. A variety of surface treatments is available to further inhibit oxidation or to improve formability. SDI GALVALUME® is produced with a regular spangle and is provided on either a 20" or 24" ID. Our products are produced to a specified minimum or nominal thickness and are sold on an actual scale-weight basis.

# HOT-ROLLED BANDS

Steel Dynamics base hot-rolled steel sheet is an unprocessed band directly off the hot-strip mill and has not been side-trimmed or cropped back to gauge. As rolled, hot bands may be susceptible to coil breaks. Additional processing such as temper passing, pickling, edge trimming and tension leveling are available on site or via a qualified external processor. SDI hot-rolled bands are produced on a 30" ID. All processed hot-rolled steel sheet will be provided on a 24" ID. Our products are produced to a specified minimum or nominal thickness and are sold on an actual scale-weight basis.

## STANDARD THICKNESS AND WIDTH EXTRAS

Please note that certain grade, thickness, and width combinations may not be available. Please refer to our product capabilities for more information.

Additional sizes may be available on an inquiry-by-inquiry basis.

### ASTM A36

Hot-rolled carbon steel sheet used for general structural purposes. Coils are excluded from qualification to ASTM A36 until they are cut-to-length and processed into a finished structural product.

For Conversion to ASTM A36	\$0.50
----------------------------	--------

### COPPER SPECIFIED (> .20%)

\$1.50

### ASTM A283

Low and intermediate tensile strength carbon steel of structural quality for general application. Coils are excluded from qualification to ASTM A283 until they are cut-to-length. Processor is responsible for testing and certifying tensile from center of coil.

For Conversion to ASTM A283 Grade C	\$0.50
-------------------------------------	--------

### ASTM A285

Low and intermediate tensile strength carbon steel for pressure vessels. Coils are excluded from qualification to ASTM A285 until they are cut-to-length. Processor is responsible for testing and certifying tensile from center of coil.

For Conversion to ASTM A285 Grade C	\$0.50
-------------------------------------	--------

### ASTM A414

Hot-rolled high-strength, low-alloy carbon steel sheet for pressure vessels. Coils are excluded from qualification to ASTM A414 until they are cut-to-length. Processor is responsible for testing and certifying tensile from center of coil.

For Conversion to ASTM A414 Grade C	\$1.50
For Conversion to ASTM A414 Grade G	\$1.50

### ASTM A455

High tensile strength hot-rolled carbon-manganese steel for pressure vessels. Coils are excluded from qualification to ASTM A455 until they are cut-to-length. Processor is responsible for testing and certifying tensile from center of coil.

For Conversion to ASTM A455 Grade G	\$1.75
-------------------------------------	--------

### ASTM A516

Hot-rolled carbon steel intended for service in pressure vessels for moderate- to lower-temperature service. Coils are excluded from qualification to ASTM A516 until they are cut-to-length. Processor is responsible for testing and certifying tensile from center of coil.

For Conversion to ASTM A516 Grade 70	\$1.50
--------------------------------------	--------

### ASTM A572

Hot-rolled high-strength, low-alloy columbium-vanadium carbon steel intended for riveted, bolted, or welded structures. Coils are excluded from qualification to ASTM A572 until they are cut-to-length and processed into a finished structural product.

For Conversion to ASTM A572 Grade 50	\$2.25
For Conversion to ASTM A572 Grade 55	\$2.75
For Conversion to ASTM A572 Grade 60	\$3.75
For Conversion to ASTM A572 Grade 65	\$4.25

Available in Types 1, 2, or 3 for most thickness and width combinations.

All offers expire after 24 hours, unless otherwise noted, and are subject to availability. All material is expected to ship within five business days from notification of availability. All truck pre-paid shipments will be invoiced at 40,000-pound minimum quantities. All prices are per hundred-weight and are based on actual scale-weight billing. Our products are sold FOB seller's place of business, or a seller-designated storage or outside processing facility.

# HOT-ROLLED BANDS

## ASTM A588

Hot-rolled high-strength, low-alloy carbon steel with improved atmospheric corrosion resistance intended for riveted, bolted, or welded structure. Coils are excluded from qualification to ASTM A588 until they are cut-to-length and processed into a finished structural product.

For Conversion to ASTM A588 Grades A or B	\$6.75
---	--------

## ASTM A606

Hot-rolled high-strength, low-alloy carbon steel sheet with improved atmospheric corrosion resistance.

Type 2	\$9.50
Type 4	\$10.50

Widths other than 48", 60", and 72" may be subject to accumulation.

## ASTM A786

Hot-rolled carbon steel floor plate, Pattern No. 4

ASTM A1011/A1018 Commercial Steel Type B	\$3.00
ASTM A1011/A1018 SS Grade 36 Type 2	\$4.00
ASTM A1011 SS Grade 50	\$4.00
ASTM A1011/A1018 HSLAS Grade 50 Class 2	\$5.00
ASTM A1011/A1018 HSLAS Grade 55 Class 2	\$5.50
For Conversion to ASTM A36	\$3.50
For Conversion to ASTM A572 Grade 50	\$5.00
For Conversion to ASTM A572 Grade 55	\$5.50
SAE J403 1010 Modified	\$3.00

Widths other than 48", 60", and 72" and grades other than CS-B require two heats minimum.

## ASTM A871

Hot-rolled high-strength, low-alloy carbon steel with improved atmospheric corrosion resistance intended for use in tubular structures and poles. Coils are excluded from qualification to ASTM A871 until they are cut-to-length and processed into a structural product.

For Conversion to ASTM A871 Grade 65	\$11.50
--------------------------------------	---------

Available in Types 1 or 2.

Certain grade, thickness, and width combinations may not be available or may require external processing. Please refer to our product capabilities for more information.

## GENERAL EXTRAS

### MAXIMUM COIL WEIGHT

700 PIW to 1200 PIW	Base
Under 700 PIW	\$1.00

### MINIMUM LINE ITEM QUANTITY

40 tons or more	Base
Less than 40 tons	\$1.00

### MECHANICAL TESTING

Mechanical Properties	\$0.25
Charpy Impact Test	\$0.25

Line item is defined as same grade, thickness, and width, with one delivery date for the entire line item. Please note that certain grade, thickness, and width combinations may require a minimum order quantity of up to 450 tons to avoid accumulation.

All offers expire after 24 hours, unless otherwise noted, and are subject to availability. All material is expected to ship within five business days from notification of availability. All truck pre-paid shipments will be invoiced at 40,000-pound minimum quantities. All prices are per hundred-weight and are based on actual scale-weight billing. Our products are sold FOB seller's place of business, or a seller-designated storage or outside processing facility.

# COLD-ROLLED SHEET

Steel Dynamics base cold-rolled steel sheet has been cold-reduced to the specified thickness and subsequently annealed and temper-rolled to achieve the specified characteristics. Alternately, customers may specify a full-hard cold-rolled sheet that ships directly off the tandem mill. SDI cold-rolled sheet is produced on a 24" ID. Our products are produced to a specified minimum or nominal thickness and are sold on an actual scale-weight basis.

# GALVANIZED HOT-ROLLED SHEET

Steel Dynamics base hot-rolled, hot-dipped galvanized product is a cost-effective solution for heavy-gauge, unexposed applications where mild surface defects such as coil breaks are not objectionable. Temper rolling may be specified to minimize the presence of cosmetic defects. A variety of surface treatments is available to further inhibit oxidation or to improve formability. SDI galvanized steel sheet is spangle-free and is provided on a 24" ID. Our products are produced to a specified minimum or nominal thickness and are sold on an actual scale-weight basis.

### MINIMUM LINE ITEM QUANTITY

40 tons or more	Base
Less than 40 tons	\$1.00

Line item is defined as same grade, thickness, and width, with one delivery date for the entire line item.

All offers expire after 24 hours, unless otherwise noted, and are subject to availability. All material is expected to ship within five business days from notification of availability. All truck pre-paid shipments will be invoiced at 40,000-pound minimum quantities. All prices are per hundred-weight and are based on actual scale-weight billing. Our products are sold FOB seller's place of business, or a seller-designated storage or outside processing facility.

# GALVANIZED COLD-ROLLED SHEET

Steel Dynamics base cold-rolled, hot-dipped galvanized or galvanized product is suitable for a broad range of applications. While generally well-suited to surface-critical applications, this product may be specified as extra smooth in order to minimize the presence of cosmetic defects. A variety of surface treatments is available to further inhibit oxidation or to improve formability. SDI galvanized and galvanized steel sheet is spangle-free and is provided on a 20" or 24" ID. Our products are produced to a specified minimum or nominal thickness and are sold on an actual scale-weight basis.

## STANDARD THICKNESS AND WIDTH EXTRAS

*Please note that certain grade, thickness, and width combinations may not be available. Please refer to our product capabilities for more information.*

*Additional sizes may be available on an inquiry-by-inquiry basis.*

# GALVALUME® SHEET

Steel Dynamics GALVALUME® product offers excellent corrosion protection in many applications through the combination of the sacrificial protection of conventional zinc coatings with the excellent barrier protection of aluminum. This product may be specified as extra smooth in order to minimize the presence of cosmetic defects. A variety of surface treatments is available to further inhibit oxidation or to improve formability. SDI GALVALUME® is produced with a regular spangle and is provided on either a 20" or 24" ID. Our products are produced to a specified minimum or nominal thickness and are sold on an actual scale-weight basis.

# ALUMINIZED TYPE 1 SHEET

Steel Dynamics Aluminized Type 1 product offers excellent corrosion protection in many applications through the combination of the aluminum/silicon coating. Based on this unique coating, the product also has outstanding heat resistance. Aluminized Type 1 is effective for applications up to 1250°F. This product may be specified as extra smooth in order to minimize the presence of cosmetic defects. Various surface treatments are available to further inhibit oxidation. SDI Aluminized Type 1 is produced with a 24" ID. Our products are produced to a specified minimum or nominal thickness and are sold on an actual scale-weight basis.

All truck pre-paid shipments will be invoiced at 40,000-pound minimum quantities. All prices are per hundred-weight and are based on actual scale-weight billing. Our products are sold FOB seller's place of business, or a seller-designated storage or outside processing facility.

# GALVANIZED HOT-ROLLED SHEET

Steel Dynamics base hot-rolled, hot-dipped galvanized product is a cost-effective solution for heavy-gauge, unexposed applications where mild surface defects such as coil breaks are not objectionable. A variety of surface treatments is available to further inhibit oxidation or to improve formability. SDI galvanized steel sheet is produced with a regular or minimum spangle and is provided on a 24" ID. Our products are produced to a specified minimum thickness and are sold on an actual scale-weight basis.

# GALVALUME® SHEET

Steel Dynamics GALVALUME® product offers excellent corrosion protection in many applications through the combination of the sacrificial protection of conventional zinc coatings with the excellent barrier protection of aluminum. This product may be specified as extra smooth in order to minimize the presence of cosmetic defects. A variety of surface treatments is available to further inhibit oxidation or to improve formability. SDI GALVALUME® is produced with a regular spangle and is provided on either a 20" or 24" ID. Our products are produced to a specified minimum or nominal thickness and are sold on an actual scale-weight basis.

## STANDARD THICKNESS AND WIDTH EXTRAS

Please note that certain grade, thickness, and width combinations may not be available. Please refer to our product capabilities for more information.

Additional sizes may be available on an inquiry-by-inquiry basis.

## HOT-ROLLED BANDS

Steel Dynamics base hot-rolled steel sheet is an unprocessed band directly off the hot-strip mill and has not been side-trimmed or cropped back to gauge. As rolled, hot bands may be susceptible to coil breaks. Additional processing such as temper passing, pickling, edge trimming and tension leveling are available on site or via a qualified external processor. SDI hot-rolled bands are produced on a 30" ID. All processed hot-rolled steel sheet will be provided on a 24" ID. Our products are produced to a specified minimum or nominal thickness and are sold on an actual scale-weight basis.

### STANDARD THICKNESS AND WIDTH EXTRAS

Please note that certain grade, thickness, and width combinations may not be available. Please refer to our product capabilities for more information.

Additional sizes may be available on an inquiry-by-inquiry basis.

#### ASTM A36

Hot-rolled carbon steel sheet used for general structural purposes. Coils are excluded from qualification to ASTM A36 until they are cut-to-length and processed into a finished structural product.

For Conversion to ASTM A36	\$0.50
----------------------------	--------

#### COPPER SPECIFIED (> .20%)

\$1.50

#### ASTM A283

Low and intermediate tensile strength carbon steel of structural quality for general application. Coils are excluded from qualification to ASTM A283 until they are cut-to-length. Processor is responsible for testing and certifying tensile from center of coil.

For Conversion to ASTM A283 Grade C	\$0.50
-------------------------------------	--------

#### ASTM A285

Low and intermediate tensile strength carbon steel for pressure vessels. Coils are excluded from qualification to ASTM A285 until they are cut-to-length. Processor is responsible for testing and certifying tensile from center of coil.

For Conversion to ASTM A285 Grade C	\$0.50
-------------------------------------	--------

#### ASTM A414

Hot-rolled high-strength, low-alloy carbon steel sheet for pressure vessels. Coils are excluded from qualification to ASTM A414 until they are cut-to-length. Processor is responsible for testing and certifying tensile from center of coil.

For Conversion to ASTM A414 Grade C	Inquire
For Conversion to ASTM A414 Grade G	Inquire

#### ASTM A455

High tensile strength hot-rolled carbon-manganese steel for pressure vessels. Coils are excluded from qualification to ASTM A455 until they are cut-to-length. Processor is responsible for testing and certifying tensile from center of coil.

For Conversion to ASTM A455 Grade G	Inquire
-------------------------------------	---------

#### ASTM A516

Hot-rolled carbon steel intended for service in pressure vessels for moderate- to lower-temperature service. Coils are excluded from qualification to ASTM A516 until they are cut-to-length. Processor is responsible for testing and certifying tensile from center of coil.

For Conversion to ASTM A516 Grade 70	Inquire
--------------------------------------	---------

# HOT-ROLLED BANDS

## ASTM A572

Hot-rolled high-strength, low-alloy columbium-vanadium carbon steel intended for riveted, bolted, or welded structures. Coils are excluded from qualification to ASTM A572 until they are cut-to-length and processed into a finished structural product.

For Conversion to ASTM A572 Grade 50	\$2.25
For Conversion to ASTM A572 Grade 55	\$2.75
For Conversion to ASTM A572 Grade 60	\$3.75
For Conversion to ASTM A572 Grade 65	\$4.25

Available in Types 1, 2, or 3 for most thickness and width combinations.

## ASTM A588

Hot-rolled high-strength, low-alloy carbon steel with improved atmospheric corrosion resistance intended for riveted, bolted, or welded structure. Coils are excluded from qualification to ASTM A588 until they are cut-to-length and processed into a finished structural product.

For Conversion to ASTM A588 Grades A or B	\$6.75
---	--------

## ASTM A606

Hot-rolled high-strength, low-alloy carbon steel sheet with improved atmospheric corrosion resistance.

Type 4	\$10.50
--------	---------

Widths other than 48", 60", and 72" may be subject to accumulation.

## ASTM A786

Hot-rolled carbon steel floor plate, Pattern No. 4

ASTM A1011/A1018 Commercial Steel Type B	\$3.00

## GENERAL EXTRAS

### MAXIMUM COIL WEIGHT

700 PIW to 1300 PIW	Base
Under 700 PIW	\$1.00

### MINIMUM LINE ITEM QUANTITY

40 tons or more	Base
Less than 40 tons	\$1.00

### MECHANICAL TESTING

Mechanical Properties	\$0.25
Charpy Impact Test	\$0.25

Line item is defined as same grade, thickness, and width, with one delivery date for the entire line item. Please note that certain grade, thickness, and width combinations may require a minimum order quantity of up to 400 tons to avoid accumulation.

All offers expire after 24 hours, unless otherwise noted, and are subject to availability. All material is expected to ship within five business days from notification of availability. All truck pre-paid shipments will be invoiced at 40,000-pound minimum quantities. All prices are per hundred-weight and are based on actual scale-weight billing. Our products are sold FOB seller's place of business, or a seller-designated storage or outside processing facility.

# PLATE

Steel Dynamics coiled strip mill plate is a band produced on the hot mill and converted to finished plates by stretcher leveling and cut-to-length processes, which are performed on-site by a qualified processing partner. Our plate products are produced to a specified nominal thickness and are sold based on theoretical nominal weight according to the following calculation: Nominal thickness x Width x Length x .2836.

## TYPICAL PLATE SIZES (additional dimensions are available):

Nominal Gauge	3/16", 1/4", 5/16", 3/8", 1/2", 5/8", 3/4", 1"
Width	48", 60", 72", 84"
Length	240" through 650"

# COLD-ROLLED SHEET

Steel Dynamics base cold-rolled steel sheet has been cold-reduced to the specified thickness and subsequently annealed and temper-rolled to achieve the specified characteristics. Alternately, customers may specify a full-hard cold-rolled sheet that ships directly off the tandem mill. SDI cold-rolled sheet is produced on a 24" ID. Our products are produced to a specified minimum or nominal thickness and are sold on an actual scale-weight basis.

# GALVANIZED HOT-ROLLED SHEET

Steel Dynamics base hot-rolled, hot-dipped galvanized product is a cost-effective solution for heavy-gauge, unexposed applications where mild surface defects such as coil breaks are not objectionable. Temper rolling may be specified to minimize the presence of cosmetic defects. A variety of surface treatments is available to further inhibit oxidation or to improve formability. SDI galvanized steel sheet is spangle-free and is provided on a 24" ID. Our products are produced to a specified minimum or nominal thickness and are sold on an actual scale-weight basis.

## STANDARD CHEMISTRY AND GRADE EXTRAS

### ASTM A653

Hot-dipped galvanized carbon steel sheet

#### Mild Steels

Commercial Steel Types A & B	Base
Forming Steel Types A & B	\$0.50

#### Structural Steels

SS Grade 33	\$0.50
SS Grade 37	\$0.50
SS Grade 40	\$0.50
SS Grade 50 – Class 1	\$1.00
SS Grade 50 – Class 2	\$0.75
SS Grade 50 – Class 3	\$1.00
SS Grade 55	\$1.25
SS Grade 57 – Modified for racking and purlin	\$1.75

#### High-Strength Low-Alloy Steels

HSLAS Grade 40	\$1.50
HSLAS Grade 50	\$2.25
HSLAS Grade 55 – Class 1 & 2	\$3.25
HSLAS Grade 60	\$3.75
HSLAS Grade 70	\$5.00
HSLAS Grade 80	\$6.50

#### High-Strength Low-Alloy Steels with Improved Formability

HSLAS-F Grade 40	\$1.75
HSLAS-F Grade 50	\$2.50
HSLAS-F Grade 55 – Class 1 & 2	\$3.50
HSLAS-F Grade 60	\$4.00
HSLAS-F Grade 70	\$5.25
HSLAS-F Grade 80	\$6.75

### ASTM A1003

Hot-dipped galvanized carbon steel sheet for cold-forming framing members

NS Grade 33	\$0.50
NS Grade 40	\$0.50
NS Grade 57	\$1.75
ST Grade 33H	\$0.50
ST Grade 40H	\$0.50
ST Grade 50H	\$1.00
ST Grade 55H	\$1.25

### SAE J1392

Hot-dipped galvanized, high-strength, low-alloy carbon steel sheet

040XLF	\$1.50
045XLF	\$1.75
050XLF	\$2.25
060XLF	\$3.75
070XLF	\$5.00
080XLF	\$6.50

### SAE J403

Hot-dipped galvanized carbon steel sheet

1006	Base
1008	Base
1020	\$0.75

Additional JIS, DIN, and manufacturer-specific standards available on an inquiry-by-inquiry basis.

## STANDARD PROCESSING EXTRAS

### SURFACE FINISH

Spangle-Free	Base
Temper-Rolled	\$0.50

### OTHER

U.L. Certification	\$0.25
Mill Edge	(\$0.50)

Mill edge required on coating weights greater than G-100.

## GENERAL EXTRAS

### MAXIMUM COIL WEIGHT

20,000# to 60,000#	Base
Less than 20,000#	Inquire

### SURFACE TREATMENT

Rust-Preventative Oil	Base
Standard Passivation	Base
RoHS-Compliant Passivation	\$0.50
Clear Acrylic	\$1.50

Please reference the attached metallic coating extras.

### MINIMUM LINE ITEM QUANTITY

40 tons or more	Base
Less than 40 tons	\$1.00

Line item is defined as same grade, thickness, and width, with one delivery date for the entire line item.

All offers expire after 24 hours, unless otherwise noted, and are subject to availability. All material is expected to ship within five business days from notification of availability. All truck pre-paid shipments will be invoiced at 40,000-pound minimum quantities. All prices are per hundred-weight and are based on actual scale-weight billing. Our products are sold FOB seller's place of business, or a seller-designated storage or outside processing facility.

# GALVANIZED COLD-ROLLED SHEET

Steel Dynamics base cold-rolled, hot-dipped galvanized product is suitable for a broad range of applications. While generally well-suited to surface-critical applications, this product may be specified as extra smooth in order to minimize the presence of cosmetic defects. A variety of surface treatments is available to further inhibit oxidation or to improve formability. SDI galvanized steel sheet is spangle-free and is provided on a 20" or 24" ID. Our products are produced to a specified minimum or nominal thickness and are sold on an actual scale-weight basis.

## STANDARD THICKNESS AND WIDTH EXTRAS

Please note that certain grade, thickness, and width combinations may not be available. Please refer to our product capabilities for more information.

Additional sizes may be available on an inquiry-by-inquiry basis.

## GENERAL EXTRAS

### MAXIMUM COIL WEIGHT

20,000# to 45,000#	Base
15,000# to less than 20,000#	\$1.00
10,000# to less than 15,000#	\$1.50
Less than 10,000#	Inquire

### MINIMUM LINE ITEM QUANTITY

40 tons or more	Base
Less than 40 tons	\$1.00

Line item is defined as same grade, thickness, and width, with one delivery date for the entire line item.

All offers expire after 24 hours, unless otherwise noted, and are subject to availability. All material is expected to ship within five business days from notification of availability. All truck pre-paid shipments will be invoiced at 40,000-pound minimum quantities. All prices are per hundred-weight and are based on actual scale-weight billing. Our products are sold FOB seller's place of business, or a seller-designated storage or outside processing facility.

# GALVANIZED COLD-ROLLED SHEET

Steel Dynamics base cold-rolled, hot-dipped galvanized product is suitable for a broad range of applications. A variety of surface treatments is available to further inhibit oxidation or to improve formability. SDI galvanized steel sheet is produced with a regular or minimum spangle and is provided on either a 20" or 24" ID. Our products are produced to a specified minimum thickness and are sold on an actual scale-weight basis.

## STANDARD THICKNESS AND WIDTH EXTRAS

Please note that certain grade, thickness, and width combinations may not be available. Please refer to our product capabilities for more information.

Minimum Thickness		Width			
Under	Thru	24" – <36"	36" – <42"	42" – <48"	48" – 52"
0.1200	0.0280	\$4.50	\$3.00	\$1.50	Base

Additional sizes may be available on an inquiry-by-inquiry basis.

Our products are sold FOB seller's place of business, or a seller-designated storage or outside processing facility.

# GALFAN® HOT-ROLLED SHEET

Steel Dynamics base hot-rolled, hot-dipped Galfan® product offers excellent corrosion protection in many applications through the combination of the sacrificial protection of conventional zinc coatings with the excellent barrier protection of aluminum. SDI Galfan® steel sheet is a cost-effective solution for heavy-gauge, unexposed applications where mild surface defects such as coil breaks are not objectionable. A variety of surface treatments is available to further inhibit oxidation or to improve formability. SDI Galfan® steel sheet is produced with a regular bright surface and is provided on a 24" ID. Our products are produced to a specified minimum thickness and are sold on an actual scale-weight basis.

# GALVANIZED COLD-ROLLED SHEET

Steel Dynamics base cold-rolled, ultra-light gauge, hot-dipped galvanized product is suitable for a broad range of applications. While generally well-suited to surface-critical applications, this product may be specified as extra smooth in order to minimize the presence of cosmetic defects. A variety of surface treatments is available to further inhibit oxidation or to improve formability. SDI galvanized steel sheet is produced with a regular or minimum spangle and is provided on a 20" ID. Our products are produced to a specified minimum thickness and are sold on an actual scale-weight basis.
